Your hospitalist team – Always there for you.

If you ever end up in the hospital, you want the very best care—24/7.

CA Hospitalist is a provider who specializes in the care of patients in the hospital. The goal of our Hospitalist team is to see that hospital patients get safe and excellent care, from admission through discharge. And they're always available for patients and their families, which means they can quickly respond to any emergency—and better yet, help prevent one, too. While a Hospitalist is caring for the patient, they maintain close communication and coordinate care with the patient's primary doctor or appropriate specialists.

.....

Wound Care Services at Capital Region

Capital Region's Wound Care services assess, treat and monitor patients' wounds and promote health management practices that prevent recurrence. This helps to minimize suffering and loss of function as well as serious and even life-threatening complications.

When a patient presents with a wound, our wound care team performs a careful assessment and develops a treatment plan to be carried out by the care team. In addition to providing direct care, certified wound care providers educate patients, caretakers and other medical professionals on the management and prevention of wounds.
